PROFESSIONAL PROFILE

Software Engineer and BSc (Hons) Computer Science graduate with First Class Honours, with hands-on experience in developing, deploying and maintaining full-stack software systems. Experienced in React, Node.js, PHP, REST APIs, relational databases and Linux/containerized environments with additional experience in AI-enabled applications and local RAG systems.

EDUCATION

- | | |
|---|----------------------------|
| BSc (Hons) Computer Science – First Class Honours | Mar 2023 - Jul 2026 |
| • University of Plymouth, UK - Delivered at NSBM Green University | |
| G.C.E. Advanced Level – Physical Science | 2020 - 2022 |
| • Mahinda Rajapaksha College Homagama | |
-

WORK EXPERIENCE

- | | |
|---|----------------------------|
| Software Engineer – Contract | Apr 2026 – Present |
| Department of Agrarian Development – Colombo, Sri Lanka | |
| • Develop and maintain departmental software systems, including production deployments and ongoing enhancements. | |
| • Independently developed and currently maintain DAD TV, the Department's broadcasting and media-management platform. | |
| Software Engineer Intern | Oct 2025 – Apr 2026 |
| Department of Agrarian Development – Colombo, Sri Lanka | |
| • Contributed to the design and development of FarmerNet Version 1, implementing farmer registration, land and cultivation management, reporting and officer-side administration modules. | |
| • Supported application/database testing, deployment and server administration using Linux, OpenShift, Docker, Podman, Nginx, SSH, Git and GitHub. | |
-

PROJECT EXPERIENCE

- | | |
|---|----------------------------|
| AI Stack VM – Private Local RAG System | Jun 2026 - Jul 2026 |
| Personal Project | |
| • Architected and deployed a self-hosted AI platform providing local LLM inference and RAG over private documents and source-code repositories. | |
| • Built OpenAI-compatible services using llama.cpp, Qdrant, Python, FastAPI, React and TypeScript. | |
| • Implemented command-line installation and management tooling, authentication and portable containerized deployment workflows. | |

- Designed and developed a document-routing and approval system for managing official correspondence across departments and divisions.
- Implemented multi-level approval workflows, role/permission-based access control, audit trails, document tracking, search and secure PDF handling using PHP, MySQL, Docker and Podman.

- Developed an offline-first Flutter mobile application for pomegranate ripeness detection and disease classification using YOLOv26 Nano and TensorFlow Lite.
- Built and trained computer-vision models using Python, PyTorch, Ultralytics and OpenCV, including a real-world ripeness dataset collected under Sri Lankan agricultural conditions.
- Integrated on-device AI inference for three ripeness stages and five disease classes.

SKILLS

- **Programming Languages:** JavaScript, TypeScript, PHP, Python, SQL
- **Frontend Development:** React, HTML, CSS
- **Backend Development:** Node.js, Express.js, FastAPI, REST APIs
- **Databases:** MySQL, SQLite, Qdrant, MongoDB
- **AI & Machine Learning:** Retrieval-Augmented Generation (RAG), Local LLM Deployment, llama.cpp, Open WebUI
- **Authentication & Security:** Role-Based Access Control, Permission-Based Access Control, Rate Limiting
- **DevOps & Infrastructure:** Docker, Docker Compose, Podman, Red Hat OpenShift, Virtual Machines, Linux, Nginx
- **Tools & Platforms:** Git, GitHub

ACHIEVEMENTS & CERTIFICATIONS

- | | |
|--|----------|
| • Career Essentials in GitHub Professional Certificate
Linkedin Learning | Aug 2025 |
| • IEEE EXTREME Programming Competition 19
NSBM Green University- Homagma | Oct 2025 |
| • Industry Preparation Training (IPT)
NSBM Green University- Homagma | Aug 2025 |
